A screenshot of a GitHub code editor interface. The top navigation bar includes 'Code' (which is underlined), 'Issues', 'Pull requests', 'Actions', 'Projects', 'Wiki', 'Security', 'Insights', and 'Settings'. Below the navigation is a search bar with placeholder 'Type / to search' and various icons. The main area shows a file named 'README.md' in the 'main' branch of a repository named 'Lab-3'. The file content is:

```
1 This line was added locally
2 This line was edited remotely Again
3
```

At the bottom right of the code editor are buttons for 'Cancel changes' and 'Commit changes...', and dropdown menus for 'Spaces', '2', and 'Soft wrap'.

A screenshot of a GitHub preview interface. The top navigation bar shows 'main' and the repository 'Lab-3 / README.md'. The main content area displays the message '23-22411-027-max Update README.md'. Below this is a preview tab, a code tab, and a blame tab. The code tab shows the same content as the GitHub code editor:

```
This line was added locally This line was edited remotely Again
```

A screenshot of a Visual Studio Code (VS Code) interface. The left sidebar shows an 'EXPLORER' view with a folder named 'LAB-3' containing a file 'README.md'. The main editor pane shows the same content as the previous screenshots:

```
1 This line was updated locally again
2 This line was added remotely
3
```

A screenshot of a terminal window with a black background and white text. The session starts with the user's name and host 'IRRAJ@DESKTOP-8ENAM2L MINGW64 ~/Lab-3 (main)'. It then shows the execution of several commands:

Note: switching to 'c2e9e6f'.
```

You are in 'detached HEAD' state. You can look around, make experimental changes and commit them, and you can discard any commits you make in this state without impacting any branches by switching back to a branch.

If you want to create a new branch to retain commits you create, you may do so (now or later) by using -c with the switch command. Example:

```
git switch -c <new-branch-name>
```

Or undo this operation with:

```
git switch -
```

Turn off this advice by setting config variable advice.detachedHead to false

```
